To Whom It May Concern,

I believe in the right of individuals to take responsibility for their health care and seek appropriate treatment. Thus, I oppose the Draft Memorandum being proposed by the FDA. I object especially to the definition of "inordinate amount" which restricts individual rights to obtain necessary compounded medication by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies. We can not all be served by the mass production medications and these specialized pharmacies are an appreciated and essential service that should be supported. In this era of supporting North America Trade, why is trade being restricted across our own state boundaries?

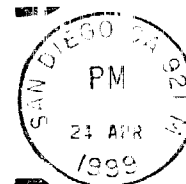

Sincerely,

Shirley Weber

98N-1265
